The Optometric Science Research Group is organizing a research and clinical symposium on keratoconus. The symposium will be held at the University of Johannesburg on the 14 and 15 July 2007. This is a call for papers from researchers, academics, clinicians and students who have an interest in keratoconus. As far as we are aware, this is the first time a symposium on keratoconus will be presented in South Africa. An abstract detailing the essence of the presentation should be sent to Professor WDH Gillan or Ms M Richter before 31 March 2007. Presentations will be of 30 thirty minutes duration. Abstracts will be evaluated by a selection panel and authors will be informed of the panel's decision in due course. Confirmation of receipt of the abstract will be forwarded to all prospective authors.
